

Evaluating the Effects of Attitudes on Health-Seeking Behavior among a Network of People who Inject Drugs

Ashley Buchanan (DrPH, MS) is an Assistant Professor of Biostatistics at the University of Rhode Island. She collaborates on HIV/AIDS research working closely with colleagues both domestically and internationally to develop and apply causal methodology to improve treatment and prevention of HIV/AIDS. In this talk, Dr. Buchanan will discuss her research on how the influence of social networks of people who use drugs can be employed to boost HIV treatment and prevention.

Monday Nov 19, 12:10-1:10 pm Ford Hall 240.

Pizza lunch will be served.

Sponsored by the Smith College SDS program
